Summary

Full-Stack Developer with 5+ years of experience building engaging applications that users love. I bring my skills in React, React Native, TypeScript, and Node.js to life, crafting interfaces that are both visually stunning and a breeze to navigate. I take pride in turning ideas into intuitive experiences, ensuring a smooth and positive journey for every user.

Skills

- React.js
- Next.js
- Docker
- TypeScript
- Node.js
- MongoDB
- Nest.js
- React Native
- AWS

Experience

Fullstack Developer - *Orange Digital*

May 2023 - Present

- Craft user-friendly and visually engaging WordPress websites, ensuring optimal functionality and responsiveness across all devices
- Optimize website deployment on AWS for scalability, security, and reliability to ensure a seamless user experience
- Design and develop high-quality, responsive mobile applications for iOS and Android using React Native
- Build web applications with Next.js and React.js, prioritizing intuitive user interfaces and efficient front-end performance
- Collaborate with designers, developers, and project managers to deliver impactful, user-centered projects on time and within budget
- Implemented responsive design principles to ensure websites and applications functioned seamlessly across all devices (desktop, tablet, mobile).
- Communicated effectively with designers to translate design mockups into functional code.
- Championed the use of user-centered design principles within the development team.
- Conducted usability testing with real users to identify and address any user experience (UX) issues before launch. This included testing for usability, accessibility, and overall user satisfaction.

Fullstack Developer - *Freelance*

September 2019 - May 2023

- Developed cross-platform mobile applications using React Native, delivering high-quality and responsive applications for iOS and Android devices for various clients.
- Utilized TypeScript to improve code reliability and maintainability, reducing the likelihood of errors and improving the overall quality of the codebase.
- Leveraged Redux Toolkit for state management, ensuring efficient and scalable handling of application data, and improving the overall performance and reliability of the applications.
- Collaborated with clients to understand their requirements and developed various web applications, including a self-improvement startup, a luxury watch brand, a women's clothing brand, a startup team management system, and a vocabulary builder progressive web app.
- Designed and developed visually appealing and responsive user interfaces using React.js, Next.js, HTML5, CSS3, and Sass, in line with clients' brand aesthetics.
- Demonstrated proficiency in modern web development technologies such as Next.js, Firebase, Node.js, JavaScript, TypeScript, and Sass, delivering high-quality and performant applications that exceeded performance metrics.
- Developed captivating and engaging single-page landing pages, showcasing unique selling points with custom animations and transitions, increasing user engagement and conversion rates.
- Built adaptable and reusable web applications, providing flexibility for future edits and adjustments, optimizing development time and resources.
- Communicated effectively with clients, providing timely updates, solutions, and support that exceeded their expectations and fostered long-term relationships.

Education

Torrens University Australia *- Bachelor's of UX & Web Design*

FEB 2019 - OCT 2021
